## SUMMARY

I am a passionate web developer, with 2 years of experience building user-friendly web applications with HTML, CSS, Tailwind, JavaScript, React, and Svelte. I build scalable and error-free applications that exceed user expectations.

## EXPERIENCE

### Frontend Developer — *GetSend Mail*

JULY 2023 - PRESENT

- Collaborated with other Full-Stack Developers in building user-friendly web applications.
- Utilized HTML, CSS, and JavaScript to create a visually appealing landing page and a seamless user dashboard.
- Aimed to enhance user understanding of the company's offerings, strengths, and available services.
- Designed the landing page to include pricing details, sign-up and login options, and a user-friendly dashboard.
- Implemented features in the dashboard to provide users with a comprehensive view of their subscription plans, including domains and aliases, and offered account management functionalities.

### Frontend Developer — *WebNexer - Inventory Management System*

September 2023 - PRESENT

- Using Svelte and modern front-end technologies, I designed and developed a pixel-perfect user interface for the "Available Stocks and Inventory" section of a web application.

## SKILLS

Front-end Web Development with;

- HTML
- CSS / SASS
- Tailwind CSS
- JavaScript
- React
- Svelte
- Technical Writing

## TESTING

JEST

## CI/CD

GIT

## OTHERS

GRAPHICS DESIGNER

HAIRSTYLIST

## LANGUAGES

English and Basic French.

- I worked closely with the development team to ensure the seamless integration of the front-end components and to improve the user experience.
- Dynamic filtering and real-time search functionality were implemented to improve the efficiency of inventory management for users.
- Contributed to the project's success by developing a visually appealing and user-friendly interface for inventory tracking and management.
